

MACHINE REFURBISHING

Union Special has recently incorporated sewing machine refurbishing into its customer support. Union Special machines that are sent in are completely disassembled, castings sanded and repainted, bushing tested and replaced as needed, parts checked and repaired or replaced as needed and the machine is reassembled, adjusted to Union Special spec's, sewn-off and repacked in a new box for returned to the customer. (Currently only 35800, 36200, 39500 & 56000 styles are being refurbished.)
